STREET WARRANTY

SCOPE AND CONDITIONS

1

DE POR

It is applicable to all Stretto brand products marketed and installed, which present some failure due to manufacturing defects and/or material fatigue from the date of the invoice or purchase-sale receipt.

- Valid claim only presenting ticket or purchase invoice.
- Non-transferable guarantee (valid only for first buyer).

Product must be presented complete (with all its components).

Griferías

Limited Lifetime Warranty

Applied to the main body of the faucet due to material and manufacturing defects.

The guarantee is limited to the repair of the product, change of components or replacement of the product when the defect cannot be repaired. It does not apply to any other expenses resulting from the failure.

Applied to the main body of the faucet and hoses for water with Technoflex® technology due to material and manufacturing defects.

The guarantee is limited to the repair of the product, change of components or replacement of the product when the defect cannot be repaired. It does not apply to any other expenses resulting from the failure.

5 year warranty

The parts corresponding to the ceramic closure, rods and fixing nut are not considered part of the main body of the faucet and are guaranteed for five (5) years, as are the parts that constitute assembly elements and connection to the water network. ** such as S-Connector, wall covering hoods, fixing set included, drain, bases, bolts or screws.

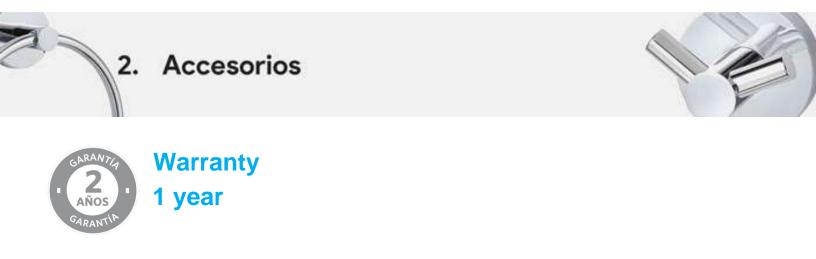

All faucet parts subject to wear due to use**, such as: aerators (external body and internal filter), shower hose, shower head, BRACKET,

chain, chain holder, drain plug and, in general, the parts that are not integral parts of the faucet body, are guaranteed against material or manufacturing defects for a period of one (1) year.

- The Matte Black surface finish is guaranteed for a period of three (3) years.
- ** Flexible for water with Technoflex® technology, are guaranteed for a period of ten (10) years.
- ** Differentiated warranty period for the inverter is three (3) years.

Shower and bathroom accessories are guaranteed against material and manufacturing defects for a period of 2 years, counting from the date of the invoice or sales receipt.

Gasfitería

Applied to plumbing category products, due to material and manufacturing defects. The guarantee considers repair or replacement of the product – at the discretion of Stretto.

4. Lozas y Sanitarios

n

Limited Lifetime Warranty

Applied to Vitreous Earthenware category products, due to material and manufacturing defects. The guarantee considers repair or replacement of the product – at the discretion of Stretto.

5 year warranty

Applies to product accessories, which are guaranteed against material and manufacturing defects for a period of 5 years, counting from the date of the invoice or sales receipt.

EXCEPTIONS TO THE WARRANTY

The STRETTO warranty does not cover:

1. Damage caused by a faulty installation, nor by improper use, nor by the use of abrasive products (including cleaners) or solvents.

Examples of bad installation and handling practices are given below.

Bad installation:

- Flexible strangled, rigid, with break and torsion.
- Overtightening of the flexible in the fitting and in the nut-overtightening in the 15/16 nut angle wrench.
- Unevenness of S-Connector.
- Unevenness of network terminals.

Incorrect distance of the body of the angle wrench with respect to the tube of the intake valve.

• Excessive use of Teflon.

• Submit the product to pressures greater than those specified for its operation; 20 bar (20.4 kg/cm2, or 204 mH2O).

- Unevenness in sanitary facilities.
- WC fixings without sufficient tightening Fixings
- between the pond and the WC without sufficient tightening which can cause leaks.
- Correct separation between the pond and the wall.
- Insufficient welding in plumbing products.

Improper handling:

- Any modification to the original product.
- Product disassembly.
- · Flexible with corrosion by muriatic acid, chlorides or caustic soda.

- S-Connector cut or lowered by the installer Cut angle
- wrench or recesses in threads of the angle wrench or recesses in flexible nuts.
- Asparagus cut.
- Aerators damaged by tools.
- Aerators damaged by hard water.
- Deformed M-10 emballed.

· Marks or damage caused by inappropriate tools. • Use of abrasive

products.

Others:

• Damages caused to Stretto products due to incorrect operation or installation of products from other brands.

- For loss or theft of products and/or accessories.
- · years caused by waste transported by the drinking water network.
- Use of couplings or extensions that modify the operation of the product.

2. Labor costs originated by the uninstallation of the product to carry out the warranty service or for the installation or re-installation of said product.

3. Accessories or related installation supplies, not manufactured by STRETTO.

4. Freight or courier expenses incurred in the process of sending the product to the technical service.

5. The STRETTO warranty is limited exclusively to the repair or replacement – at STRETTO's discretion – of the defective parts of the product and does not include the payment of compensation for damages of any kind resulting from leaks, humidity, floods or others.

Stretto Recommendations

Before installing our taps, we recommend carrying out a general cleaning of the pipes.

Stretto recommends that the installation of its products be done by a qualified and certified plumbing installer.

- When installing a faucet equipped with water hoses, avoid bending or deforming them, this way the water will flow without obstructions, favoring the useful life of the product.
- For faucets equipped with aerators, it is advisable to remove and clean them every one (1) month, since there are geographical areas where the water is very hard and quickly clogs the component.
- If the faucet has a very low water flow, disassemble the aerator and clean its internal components with a fine brush to remove any impurities present.
- If you notice that the aerator is clogged, remove it from the faucet and let it soak overnight submerged in a container with water and vinegar, in proportions of 2 to 1 respectively. Then, place the aerator under running water to drain the debris.
- The above procedure is also recommended for cleaning shower handles with non-removable shower heads that present obstructions. Pins or the like should not be used for this purpose, as they could damage the internal mechanism.
- It is recommended to maintain and clean the shower handles every one (1) month.
- To clean the faucet, use a soft cloth with a neutral, non-abrasive cleaner. Subsequently, dry the surface with a soft cloth. •
- Do not use cloths with an abrasive surface to clean the taps.
- To prolong the life of your faucet, we suggest not using metal fiber pads, abrasive cleaners or cleaning powders.
- It is recommended to change the hoses for water every 5 years; Technoflex hoses, every 10 years.
- Warning for flexible hoses: do not apply a direct flame or come into contact with elements at high temperatures. When you
- have finished using your touch taps frequently, close the water flow with the shower head.
- When recharging devices with batteries, close the flow of water. Charge in a dry place out of the reach of children. Under no circumstances use muriatic acid, hydrochloric acid, chlorides, caustic soda, or other abrasive cleaners to clean
- clean the surface of the faucets or the hoses, as these chemicals cause irreparable damage to the surfaces of these products and, consequently, will
 - void the product warranty.

high water efficiency

 High water efficiency that guaranteesoptimal consumption.

• The Chilean standard NCh 412/2012 indicates that aproduct is efficient when its flow rate is less than 7lt/min(measured at 3 bar pressure).

water efficiency •100% sealed and reinforced edges that prevent detachment. • Water efficiency that guarantees

- optimum consumption.
- The ChileanstandardNCh3196/2-2010 indicates that a product is efficient when its flow rate is less than 9lt/min(measured |
- at 3 bar pressure).

airmix

· Technology that mixes air bubbles with water. • Does not alter the flow. Allows you to save water without affecting the user experience.

 Product with certified waterefficiency (NCh 3196/2-2010). •Provides optimum spray angle. •Guarantees a consumption of lessthan 9 It/min at 3 bar pressure.

technoflex

- Flexible vinyl resistant to corrosive
- agents. It can be twisted and bent without being damaged.
- Resistant to temperature changes.
- Extended warranty of 10years of
- manufacture.

fastfix

· Quick and practical fixing system. Installation without the use of tools.

MOVABLE aerator

 Head with a MOVABLE aerator that delivers a water outlet in different directions depending on the assigned movement.

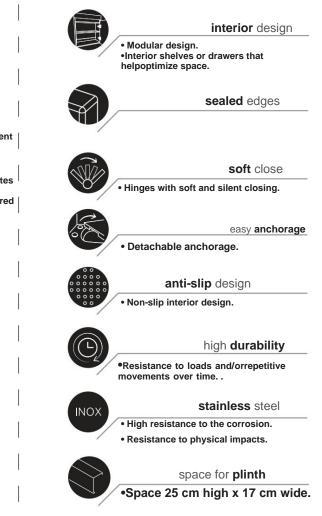

perfect spray

· Incorporation of up to 3 types of jets that guarantee an optimal shower sensation.

·Quick disassembly of components that facilitates cleaning.
